🔷 EXPERIMENT 5 — GitHub Desktop Workflow

✅ STEP 1: Install & Open GitHub Desktop

- Open **GitHub Desktop**
- Sign in with GitHub account

✅ STEP 2: Create Repository (Initialize Git)

In GitHub Desktop:

1. Click:

File → New Repository

2. Fill details:
    - Name: data-science-project5
    - Local path: choose folder
    - Initialize with README: optional
    - Git ignore: None (we will add manually)
3. Click:

Create Repository

✅ STEP 3: Publish to GitHub

Click:

Publish repository

✔ This pushes repo to GitHub (remote setup done)

🔷 STEP 4: Create Branch (GIT-EXAM-1)

In GitHub Desktop:

1. Top bar → Click branch name (main)

2. Click:

New Branch

3. Name:

GIT-EXAM-1

4. Click:

Create Branch

🔷 STEP 5: Create program2 (Palindrome)

In File Explorer/VScode

Go to repo folder → create file:

program2.py

Code:

```
text = input("Enter string: ")

if text == text[::-1]:
    print("Palindrome")
else:
    print("Not Palindrome")
```

🔷 STEP 6: Create program1.py (Squares)

Create file:

program1.py

Code:

```
for i in range(1, 11):
    print(i, "square =", i*i)
```

🔷 STEP 7: Commit changes

Go to GitHub Desktop:

1. You will see changes listed
2. Add commit message:

Added palindrome and squares programs

3. Click:

Commit to GIT-EXAM-1

🔷 STEP 8: Push to GitHub

Click:

Push origin

✔ Branch GIT-EXAM-1 is now on GitHub

🔷 STEP 9: Create IGNORE folder

In File Explorer/Vscode:

```
IGNORE/
  test1.txt
  test2.txt
```

✔ Add any sample text inside files

🔷 STEP 10: Create .gitignore file

Create file in root folder:

.gitignore

Add inside:

IGNORE/

✔ This tells Git:

Ignore this folder completely

🔷 STEP 11: Verify ignoring

Go to GitHub Desktop:

✔ IGNORE folder should:

- NOT appear as commit changes OR
- Show as ignored (greyed out)

🔷 STEP 12: Commit .gitignore

In GitHub Desktop:

1. Message:

Added gitignore for IGNORE folder

2. Click:

Commit to GIT-EXAM-1

🔷 STEP 13: Push final changes

Click:

Push origin

🔷 STEP 14: Verify on GitHub

Go to repository in browser:

✔ You will see:

- program1.py
- program2.py
- .gitignore

❌ You will NOT see:

IGNORE/
